The Conrad Foundation believes high school students have the potential to create the next world-changing, commercially-viable product or solution in the areas of: Aerospace and Aviation, Energy and Environment, Cyber-security and Technology, and Health and Nutrition. The Spirit of Innovation Challenge invites students from around the globe to Get Their Genius On™.

What’s the incentive? Finalist teams receive a travel grant to present at the 2013 Innovation Summit at NASA Johnson Space Center for a chance to win a $10,000 seed grant to develop their product or service.

Check out our online community to learn more about the competition, challenge categories and other online resources.

Team Maverick Robots created a shoe that converts activity into electricity, creating an energy source for portable devices.
Get started now!

Register a personal profile at www.conradawards.org and invite your friends and teachers to join the community. Take advantage of tools and resources to inspire the development of innovative ideas.

Create a team and Get Your Genius On!™

Now is the time to develop your ideas for a product or service in your selected category. If you have several ideas, you can enter in more than one category. Teams can be made up of 2-5 students between 13-18 years old from different schools, states and even counties. Create a global team through our new members’ forum.

Submit your one-page abstract online by Oct. 24, 2012.

Accepted proposals will be invited to submit a full proposal as detailed on the website. We’re there for you along the way! The Conrad Challenge provides free access to mentors, webinars and forums to answer all participant questions. Plus, the community is a great place to talk about the sciences, get your geek on and make new friends.

Team Infinity developed a fabric which helps maintain ideal body temperature regardless of extreme environments. Check out their awesome armband prototypes.
